

Value

Heatmap showing the relationship between 'Len' (100, 200, 400, 600, 800, 1000, 2000) and 'thresh' (2, 4, 6, 8, 10, 12, 14, 16). The color scale ranges from dark red (low) to dark blue (high). The heatmap shows that for lower 'Len' values, the relationship with 'thresh' is more pronounced, with higher values (blue) for lower thresholds and lower values (red) for higher thresholds. As 'Len' increases, the values become more uniform across thresholds.
